*Synchros, Design,

The authors here discuss SOCOTEL SI sub exchanges
and concentrators. After reviewing the general
principles which led to their inception, they present the
connection diagrams and describe the equipment; they
also indicate the principles of establishing and discon-
necting calls as well as the operation of the auxiliary
link and end with comments on methods of supplying
power. In conclusion, the results obtained to date and
the fabrication methods are briefly reviewed. (Author)
