<p>Hofbauer, Th. and Koch, K. M. <u>ON THE MECHANISM OF THE MAGNETIZATION DISCONTINUITIES.</u> Preliminary Communication. [1962] 5p. (refs. figs. omitted). Order from SLA \$1.10</p> <p>Trans. of Zeitschrift für Physik (West Germany) 1951, v. 130, no. 4, p. 409-414.</p> <p>DESCRIPTORS: Iron, Nickel, Wire, Magnetic fields, Magnetic effects, Torque, Deformation, Electric wire, *Magnetism.</p> <p>It was found that in specimens with preferred direction of magnetization an auxiliary field at rather high frequency promotes both the release and the course of the magnetization discontinuities thus causing - with given values of the main field - an increase in value of the saturation magnetization and of the remanence. (Author) (Physics--Magnetism, TT, v. 8, no. 10)</p>	<p>62-16966</p> <p>I. Hofbauer, T. II. Koch, K. M.</p> <p>C226289</p> <p>Office of Technical Services</p>
