Koller, D. K., Buchel, V. O., and Kal'nin, E. M.
MECHANISM OF REACTIONS OF ELECTRICAL
CRACKING OF HYDROCARBONS. [1961] 9p. 27 refs.
Order from OTS or SLA \$1.10 61-16864

Trans. of Zhurnal Prikladnoi Khimii (USSR) 1940,
v. 13, no. 1, p. 102-117.

DESCRIPTORS: *Hydrocarbons, Decomposition,
*Methanes, Electric discharges, Chemical reactions,
Free radicals.

The yields of acetylene in electrical cracking of
methane and consumption of electrical energy on its
formation depend on the temperature of the gas in the
discharge. In electrical cracking both the electrical
and thermal energy are to a certain extent interchange-
able. Change of the value of q^0 by change of the amount
of electrical energy transmitted to the gas or by its
preheating give, within certain limits, practically the
same effect with respect to the yield and energy spent
for cracking of methane. (Author)
