Order from SLA \$1.10

63-18473

I. Borimov, M.
II. Kynev, S.
III. Georgieva, I.

Trans. of Bulgarska Akademiya na Naukite [Doklady]
1962, v. 15, no. 7, p. 715-718.

DESCRIPTORS: *Semiconductors, *Single crystals,
*Cadmium compounds, *Sulfides, *Rectifiers,
Coatings, Silver compounds, Copper compounds,
Oxides, Electrical properties, Photoconductivity.

A new way of obtaining relatively good rectification
from cadmium sulphide single crystals is reported in
which the anode plays a decisive role with respect to
the forward current. It is presumed, on the basis of
the experimental measurements, that in this case not
only the injection of electrons from the cathode, but
also that of holes from the anode, plays an essential
role. (Author)
