It is important to be clear that the above is not an attempt to replicate the results of the existing literature. We are not attempting to provide a comprehensive review of the literature on the effects of the environment on the growth of the economy. The purpose of this paper is to provide a critical review of the literature on the effects of the environment on the growth of the economy. The paper is organized as follows. Section 2 discusses the theoretical framework. Section 3 discusses the empirical evidence. Section 4 discusses the policy implications. Section 5 concludes.

 THE CALCULATION OF PROFILE LOSSES IN MA-
 JING TURBINES WITH BLADE TRAILING EDGES
 OF FINITE THICKNESS (iz Rascheta Profilnykh Poter
 Vzhiganiya i Eroziyi Vodyashykh Turbin s Vykhasnymi
 Krayevymi Krayevymi Izhichkami). Feb 61 [15p].
 Zhurnal Mashinostroyeniya (Moscow).
 (NII Mashinostroyeniya, TsSU, no. 32, 62, p. 63) N. 61-15432

English in Soviet Science (USSR) 1967 [v. 23] no. 8,
 p. 24-29

The author calculates the profile losses in
 major turbines with trailing edges of finite thickness
 for flow velocities up to the speed of sound. The in-
 vestigation is based on Leshchinskiy's method of cal-
 culation which is the relationship between the boundary
 between the flow and the blade and the trailing edges
 is obtained by generalizing experimental data relating
 calculated blade profiles with the outlet edges (the
 flow and a function of the speed of sound).
