FOREWORD

The purpose of this survey is to provide assistance to intelligence analysis on all aspects of the Sino-Soviet Bloc economy and on Bloc efforts to gain economic and political advantage by expanding economic and technical relations with the non-Bloc countries. The survey lists all known government-conducted and government-sponsored economic research on the Sino-Soviet Bloc areas covered, through SECRET classification.* The material listed includes:

1. Research studies and analytical reports dealing directly with Sino-Soviet Bloc economic programs.
2. Reports on specialized aspects of particular Bloc economic activities, which provide useful background material for analysts studying the susceptibilities of non-Bloc countries to Bloc economic influences.

This survey lists projects initiated, in progress, completed, or cancelled during the period 1 December 1956 through 30 November 1957. Previous surveys have covered the periods since January 1954. The last Bloc survey (EIC-S-27) covered the period 1 January 1956 through 30 November 1956.

The material on external research projects** was assembled by the EIC Secretariat with the assistance of the External Research Staff of the Department of State. The economic sections of National Intelligence Estimates and certain of the basic economic contributions thereto are listed. Appendix A lists maps having economic implications.

* It should be noted that, although the results of many government-sponsored contracts are UNCLASSIFIED, the relationship between the government agency and the contractor concerned may be classified up to SECRET.

** External research projects, as defined for these surveys, include government contracts by the indicated government agencies with other government agencies, as well as with private research groups.

- iii -

S-E-C-R-E-T

S-E-C-R-E-T

The economic sections of, and contributions to, National Intelligence Surveys are listed. A description of these sections is given in Appendix B.

"Economic" is defined broadly for purposes of this survey, as indicated in the Table of Contents. The majority of projects listed are primarily economic in character, but technical projects which contain economic sections or have economic implications have been included.

The geographic areas covered in this survey are limited to the Sino-Soviet Bloc, and include the following countries:

USSR (including Outer Mongolia)	Communist China (Including Inner Mongolia)	Germany (East) Hungary	Korea (North) Poland
Albania	Czechoslovakia	Indochina (North)	Rumania
Bulgaria			

This survey lists projects initiated in progress or cancelled during the period 1 December 1956 through 30 November 1957. Previous surveys have covered the periods January 1954 to the end of 1953, and January 1954 to the end of 1955. The order of project listings is first by subject, thereunder by geographic area, and thereunder by producing or sponsoring agency. In the last category, the listing is as follows: first, US Government agencies in alphabetical order; following these, Economic Defense Intelligence Committee (EDIC) Reports; Economic Intelligence Committee

25X1X

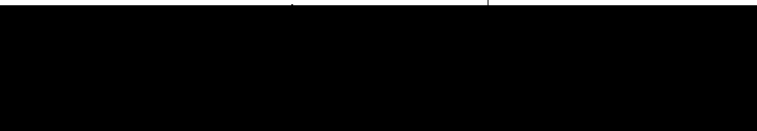

In all cases, requests for projects listed in this survey should be addressed to the producing or sponsoring agency, and channeled through the appropriate liaison arrangements of the requestor's agency.

Population Estimates and Projections for
Selected Countries: 1956 to 1959

Sponsor: CIA Unclassified

Description: One of a series produced under an over-all project, "Foreign Manpower Research Studies." This report presents estimates and projections of total population for about 50 countries or administrative units, including many of those in the Sino-Soviet Bloc, in Asia, Europe, America, and Oceania for January 1 of each year 1956 to 1959. The latest census counts and population estimates for January 1, 1950 and July 1, 1938, are also shown for comparison.

A Method of Projecting Mortality Rates Based on
Postwar International Experience

Sponsor: Air, Office of Social Science Programs,
Personnel & Training Research Center, Lackland
Air Force Base, Texas Unclassified

Description: This study was produced under the over-all project "Population Studies in Intelligence Methodology USSR." See page 23. This report describes the development of a method of projecting mortality rates, for use in preparing population projections, from postwar trends in mortality for 25 countries. The method of projecting mortality rates described in this report has been used by the Foreign Manpower Research Office in the preparation of population projections for each of the European Satellite countries and the USSR.

Oblast Political and Population Survey

Sponsor: Air, Directorate of Intelligence,
Targets Secret

Description: One of several studies produced under an over-all project, "Analysis of USSR Target Complexes (Urban Areas)", see Section VIII, Regional Analysis. Study to be conducted to look for the following information: recent territorial changes; broad economic, military and political significance of the area; organization and size of government and military control group; population and labor force; social characteristics; political and social tensions; and potential for evacuation. Same information is to be collected on the capital of the oblast and other urban cities of 10,000 or more population if data is available. All oblasts will be covered in group by economic region starting with the Far East. Reports on 22 oblasts have been completed; 21 are in progress.

Potential Research on Specialized Manpower and Its Utilization in the Soviet Union

Sponsor: National Science Foundation Unclassified

Description: The study, the results of which are given in this report, was devoted to attempts to formulate answers to three questions: (1) what aspects of the utilization of Soviet specialized manpower ought to command our attention, because of their importance to an understanding of Soviet performance and potentials; (2) does information exist which would permit these aspects to be investigated effectively; (3) what criteria and research procedures can be devised that will offer a basis for meaningful analysis of such data as are or may become available.

Population Studies in Intelligence Methodology China

Sponsor: Air, Social Science Programs, Personnel and Training Research Center, Lackland Air Force Base, Texas

Confidential

Contractor:
Commerce
Bureau of Census
Foreign Manpower
Research Office

Description: This project extends the program of population and labor force studies to Communist China. The initial phase represents an intensive survey of information, chiefly from Chinese, Russian and Japanese sources. Some of the topics to be included in this survey are: population size and distribution; urbanization; population dynamics including vital statistics and rates, and internal migration; labor force composition by major socio-economic groups; impact of social, economic and political trends on the size and distribution of the population and the occupational composition of the labor force. Reports from this contract period will consist of:
(1) an annotated bibliography relating to the materials compiled on the subject listed above;
(2) an evaluation of the materials assembled, including recommendations for specific additional research on the population and manpower of Communist China.

Initiated: March 1956

SINO-SOVIET BLOC

The Radio Communications Equipment Industry in the Sino-Soviet Bloc

CIA, ORR

Project No. 36.597

Secret

Description: This project will be a survey of producing facilities, capacities, requirements, trends, and methods of production. The objective is to estimate the production and capabilities of subject industry in the Sino-Soviet Bloc.

Initiated: Fourth Quarter 1954

Cancelled: September 1957

Cross Reference: V, A, 4, b

SOVIET BLOC

The Wire Communications Equipment Industry in The Soviet Bloc

CIA, ORR

Project No. 36.902

Description: A basic research study of this industry in the USSR, East Germany, Czechoslovakia, and Hungary.

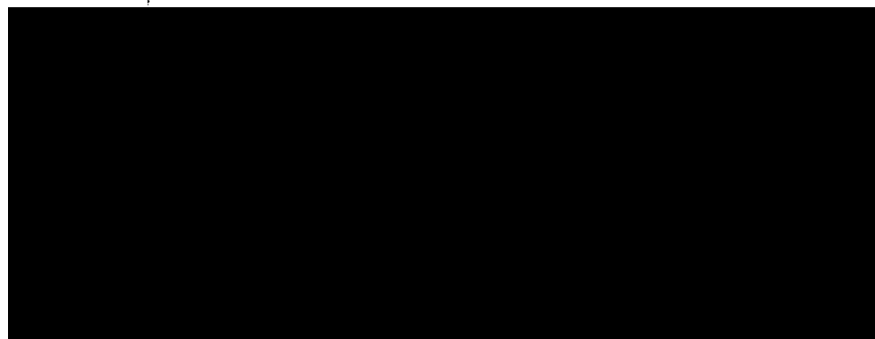

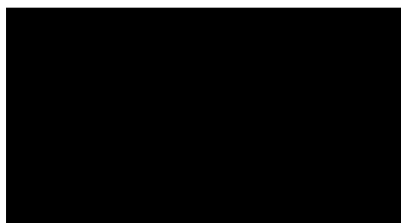

Initiated: Third Quarter 1955

Cancelled: September 1957

CHINA

Chinese Economy Research Project

Sponsor: Air, Deputy Chief of Staff, Development
Unclassified

Contractor:
RAND Corporation
Santa Monica
California

Description: A study based on original Chinese language statistical materials of the basic economy of Mainland China with particular reference to China's national income, agriculture, individual industries, and population. Individual reports on agricultural production and electric power have been published. Additional studies on textile production, population statistics and rice production are partially completed. A study of China's national income and its components is now under way. It analyzes Gross National Product by originating sector, by types of income and by recipients, for the years 1933 and 1952-55.

Special Warfare Area Handbook for Czechoslovakia
Sponsor: Army, Office of the Chief of Special
Warfare

Description: One of a series of reports on
"Special Report and Studies on Selective Geo-
graphical Areas". This report presents detailed
background information on the sociological,
political, economic and military factors of a
target area. The information and analysis con-
tained in the report is designed to provide an
understanding of the likes, dislikes, attitudes,
and weaknesses of the people. All the information
presented has been selected to assist identifi-
cation of vulnerabilities and targets estimates
of probable reactions to given situations,
selections of appropriate themes, development
of the most applicable techniques of persuasion
and avoidance of inappropriate action, messages
and language. Report on Poland was completed
October 1957.

EAST GERMANY

The Economy of East Germany - Part II

Sponsor: CIA

Unclassified

Description: Part I of this project was completed in September 1956. The purpose was to produce, from unclassified sources, economic and statistical studies of national accounts, price indices, and interindustry accounts for the East Germany economy. The objective of Part II is to: (a) define reports prepared during Part I; (b) construct sectoral price indices in East German prices; (c) carry the work already done on the industrial sector over to the agricultural, construction, and transport sectors; and (d) to calculate the value added to the trade sector.

Representative Ruble-Dollar Ratios

CIA, ORR

Project No. RA-15

Description: This project is designed to determine the relationships of Soviet prices to US and world prices for each of the principal sectors of the Soviet economy. These ratios are necessary to assess the cost of and the effect on the various sectors of the Soviet economy of the Soviet atomic energy program; Soviet guided missile program; and Soviet air defense program. These may also prove to be a key criterion in the selection of items for trade controls. In addition, the ruble-dollar ratios will be used to compare the military outlays of the USSR and the US to estimate the potential of the USSR to carry on a "hot" war, and to improve the estimates of GNP and the intersectoral analysis of the Soviet economy.

- 365 -

S-E-C-R-E-T

S-E-C-R-E-T

NIS CHAPTERS

In preparing this survey, the NIS Sections which are primarily concerned with economic aspects are included. A brief description of the NIS Chapters included follows:

CHAPTER I.

This Chapter summarizes the salient features of the other NIS Chapters. Sections dealing with economic aspects are included in this survey.

CHAPTER II. MILITARY GEOGRAPHY

SECTION 25. Urban Areas

Patterns of urbanization, and significant environmental factors; general characteristics of urban areas; detailed text and graphic description of key urban areas, including significant political, economic, transportation, and military aspects; summarized descriptions of other selected urban areas.

CHAPTER III. TRANSPORTATION AND TELECOMMUNICATIONS

SECTION 30. Introduction

Presents an analysis of the basic intelligence contained in the Chapter on Transportation and Telecommunications.

SECTION 31. Railway

SECTION 32. Highway

SECTION 33. Inland Waterway

Presents a general statement on the mode of transportation indicated for the Section, its position in the economic structure, relationship to the country's general transportation structure, a statement of war damage and subsequent restoration, and its capacity in terms of peacetime requirements; discusses the salient characteristics of the transportation network (facilities, construction and maintenance, and traffic interruption factors), control and organization operations, equipment, and the principal facilities.

- 367 -

S-E-C-R-E-T

S-E-C-R-E-T

NIS CHAPTERS
(Continued)

CHAPTER III. TRANSPORTATION AND TELECOMMUNICATIONS (Continued)

SECTION 34. Petroleum Pipe Lines

See Section 62.

SECTION 35. Ports and Naval Facilities

Presents a comprehensive evaluative discussion of areal distribution and grouping of ports; characteristics of ports in regard to: comparative size, layout, normal commercial capacity, use, methods of operation, adequacy, and relative significance in and functional relation to the transportation system and commercial economy of the area; the government, control and administration. General analysis of naval facilities with tables of activities and facilities of each base included.

SECTION 36. Merchant Marine

Salient characteristics of the country's merchant marine, including governmental policies, significance in the economy, ownership of the fleet, detailed composition of the fleet and characteristics of vessels, chartering, normal shipping routes and ports of call, and operations and traffic.

SECTION 37. Civil Air

Civil aviation within and related to the country, including salient factors in development and present status; governmental control and regulation; international agreements and influences exerted by foreign nations; ownership, organization and operations of both scheduled and significant other air carriers; personnel and training; maintenance; general survey of air facilities; military potential.

- 368 -

S-E-C-R-E-T

S-E-C-R-E-T

NIS CHAPTERS
(Continued)

CHAPTER III. TRANSPORTATION AND TELECOMMUNICATIONS (Continued)

SECTION 38. Telecommunications

Survey of the telecommunication systems of the Area. Salient points include: adequacy of the various means of communication; patterns of development; administration and control; raw material sources and manufacturing capability; schools and training; operation, quantity, and quality of equipment of domestic and international telephone, telegraph, submarine cable, radio communications and broadcasting facilities; military appreciation and vulnerability.

CHAPTER IV. SOCIOLOGICAL

SECTION 41. Population

Significant details of demography; population size, composition, and geographic distribution; structure (age-sex patterns, marriage and family groups, working-age and dependent groups); vital statistics, trends, and population movement; population problems and policies.

SECTION 44. Manpower

Manpower resources; labor force, utilization, planning and control; mobility and hiring practices; working conditions; management and labor relations; organization and labor problems and legislation.

CHAPTER VI. ECONOMIC

SECTION 60. Introduction

General characteristics of the economy, its energy and raw material base, its development, and the framework of government policy within which it operates; overall information such as gross national product, the skills and distribution of the labor force, and the dynamics and trends of the economy.

- 369 -

S-E-C-R-E-T

S-E-C-R-E-T

NIS CHAPTERS
(Continued)

CHAPTER VI. ECONOMIC (Continued)

SECTION 61. Agriculture, Fisheries, and Forestry

The country's food supply, and food balance; the supply of industrial crops and timber; influence of climate, terrain, government policy and other environmental factors upon agriculture; production methods and skills; comprehensive and detailed data on agriculture, fisheries, and forestry.

SECTION 62. Fuels and Power

Detailed survey of the country's energy base; solid fuel and petroleum development, reserves, production, processing, distribution, and foreign trade; thermal, hydro, and nuclear electric power development and potential, and details of significant installations.

SECTION 63. Minerals and Metals

The country's mineral raw material base and its development, government policy on the extractive industries and foreign trade; the iron and steel industry in all phases, including the facilities and products of significant plants; reserves, ore mining, milling, smelting, and refining of copper, lead, and zinc, light metals, precious metals, fissionable materials, and minor nonferrous metals; deposits and output of nonmetallics; cement and flat glass production; other construction materials.

SECTION 64. Manufacturing and Construction

The manufacture of capital and consumer goods, semifinished materials, and components; government policy toward manufacturing and foreign investment; for each manufacturing sector (such as heavy plant equipment, automotive, chemicals, arms, and ammunition), production and plant descriptions, with assessments of efficiency of operations and quality of goods produced; the construction industry.

S-E-C-R-E-T

NIS CHAPTERS
(Continued)

CHAPTER VI. ECONOMIC (Continued)

SECTION 65. Trade and Finance

The country's financial structure and its operation; government fiscal policies; the tax structure, revenues and expenditures, internal and external debt; the banking system; patterns of domestic trade; international trade, the balance of payments, international assets and liabilities, government foreign trade policies and participation therein; cartels.

SUPPLEMENT I. PORTS AND NAVAL FACILITIES

Presents detailed treatment of individual ports, including location, classification, harbor and terminal facilities, berthing estimates, estimated port capacity, and planned development and improvements.
