Typhoon Photography - Equipment and Specifications

In an effort to expedite the exploitation and analysis of typhoon photography, and at the same time improve read-out, the following recommendations are submitted for your immediate consideration:

- a. That only configuration A1 be used, all cameras included.
- b. That the 6 inch cameras be set for 90% overlap.
- c. That the 24 inch rocking camera be set for 60% overlap.
- d. That the tracker be set for 60% overlap.
- e. That the field track showing approximate position, time and name of typhoon be furnished with each flight.
