Navy Views on ARC Recommendations

The Navy would have preferred an opportunity to staff adequately this paper and the attached CIA dissent to carefully consider all factors. Since this was not possible the Navy representative has no alternative but to disagree with the basic proposal and to state that as of this time the Navy considers the previously agreed upon four Groups as coming before coverage of 25X1D [REDACTED]. This does not mean that the Navy is against coverage of [REDACTED] but merely places it in order of priority for coverage as a fifth group coming after the previously agreed upon four.
