MEMORANDUM FOR: Associate Deputy Director for Intelligence
Associate Deputy Director for Operations
Associate Deputy Director for Administration

FROM: James V. Hirsch
Deputy Director for Science and Technology

SUBJECT: Results of the Technology Application Steering
Panel, 28 August 1989

1. This documents the guidance and decisions we provided to the Office of Research and Development at the Panel meeting. If something is missing or needs modification please let me know. ORD will proceed with their FY90 work on the basis of this guidance.

25X1 2. The panel identified no major changes in ORD's FY90 research program as briefed, [redacted]. The panel questions whether there is an Agency application using this technology; ORD will reexamine the potential customers and will either bring the project to a conclusion or advise us if they develop a more convincing case. ORD will brief the ADDO and the ADDA individually on the projects of interest to their respective directorates. ORD will also arrange demonstrations of the Data Extraction From Text System in the Counterterrorism Center for the ADDI, the DDA and the ADDA.

25X1 3. The panel expressed high interest in the [redacted] project to provide a test bed configuration of trusted computer systems, a file server, a network gateway and terminals, in a local area network in the Counterintelligence Center. The Office of Security has indicated an interest in providing some funding in FY90. In response to panel guidance, ORD will reorder priorities to make some FY90 funding available and will develop a phased program plan that will permit initiation as soon as possible.

4. For projects designated as technology application and thereby leading to turn-key deliveries to customer offices, we provided the following guidance:

**SECRET**

SECRET

SUBJECT: Results of the Technology Application Steering Panel, 28 August 1989

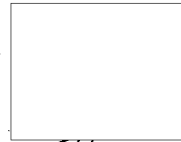

25X1

a. The [redacted] project for the [redacted] Group can be completed through Phase 1. The panel will make a separate decision on Phase 2 at a later time.

b. The Data Extraction From Text for Forces project for the Office of Information Resources can be initiated.

25X1

c. The Audio Transcriber Workstation project for Agency wide use can be initiated. The project must permit full compatibility with the [redacted] program, which is still in the definition stage.
