56 igor sheftunov on last week's cpsu cc plenum and andropov's speech. speaking about international issues, andropov pointed out that aggressive character of reactionary extremist forces headed by u.s. imperialism has been enhanced. he said efforts are being made to turn back course of events and added this policy will not be successful for imperialists. sheftunov goes on to condemn u.s. support for reactionary dictatorships and rotten monarchies and its support for shah's regime. he discusses persecution of tudeh party by shah and how attempts to suppress liberation movements in iran failed. says when imperialists wanted to resort to force to stifle revolutionary movement, soviet union announced it would not allow foreign intervention in iran's domestic affairs. general huyser had to leave country, and shah fled, too, revolution succeeded, but west tried to to stifle it with sanctions. ussr allowed iranian goods to pass through soviet territory. thus thwarting siege plans. in their efforts to reestablish domination over iranian people and other nations, imperialists have learned from their mistakes. this is why they strived, with help of elements like qotbzadew, to spread discord among anti-imperialist forces. in order to to achieve this they used lethal weapon of anticommunism on extensive scale. rightist forces in iran have actually showed support for reagan's call for anti-communist crusade and prepared ground for persecution of tudeh party coupled with anti-soviet acts. in his remarks to ussr supreme soviet, gromyko pointed out ussr supports normal and friendly relations with iran. soviet union wants to see iran independent and has always supported goodneighborly relations with it. gromyko then expressed regrets about recent acts against employers of soviet organizations in iran and said these acts do not help to expand bilateral relations. he stressed that soviet union's actions will be based on its views on whether iran is willing to maintain normal relations with us or if it has other intentions.
