far east

121 anon roundup favorable reactions in asia to andropov's peace-seeking initiatives. asian social circles consider these initiatives as clear example of ussr's sincere search for peace. delhi's indian express writes that moscow's proposal disarms those in united states who alleged that soviet union intends to move its missiles from west to east of soviet union. by these remarks they want to hide washington's military preparations in various parts of world. as for southwest asia, for a long time now u.s. arms, including nuclear arms, are being delivered there and are being stockpiled in u.s. bases on diego garcia and (? masirah). bright star 83 maneuvers too are among these military preparations. under such conditions, coordination of steps and actions by all countries and nations that want to thwart u.s. military preparations in region gains paramount importance. soviet union supported nonaligned movement's call for turning indian ocean and persian gulf to non-nuclear zones, dismantling of foreign bases and ending of any foreign presence in this region. new peace-seeking initiative put forth by andropov creates a favorable international atmosphere for struggles for disarmament and detente, not only in europe but in other continents too.
