Program LSTINV

Date 6 October 1981

CONTENTS

SOFTWARE SUMMARY

LIST-INV will produce listings of the 'EDT*INV'file, which is an EDRPT file.
The following types of listings may be obtained: Master, Component sequence,
Stock-number sequence, and Name sequence. The component sequence listing will
break on component and list the totals for each component.

2

INPUT AND OUTPUT DESCRIPTION

INPUT DATA

Two data cards must be input to the program, the option card and the LAST-LINE-NUMBER card. One of the following options must be selected and punched in column 1 of the option card:

Option number	Description
1	Master Listing
2	Component Sequence
3	Stock-number sequence
4	Name sequence

The number of the last line of the file containing valid data must be punched on the LAST-LINE-NUMBER card. The line number must be five digits long, right justified and zero filled.

3

OUTPUT DATA

Printer Output

Printer output will be the same format for all options of the program. The paper used is form 143.

Normal Run Instructions

The operator should load the card deck submitted with the request and return all listings to the requestor.

Abnormal Run Instructions

If the job fails to terminate successfully, all listings and error messages should be returned to the requestor, who should contact CSD.
