# Emigre Tells of Research in Soviet In Parapsychology for Military Use

# By FLORA LEWIS

A Second and A State PARIS, June 18-An emigre Soviet some Soviet work appeared aimed at physicist says that the Soviet Union has been doing secret work in parapsychology, for what appear to be military and police purposes.

the states of

The Soviet emigre, August Stern, who now lives in Paris, spent three years in page document on parapsychology handa secret Siberian laboratory in the late 1960's trying to find a physical basis for psychic energy, or "psi particles," as they are called.

Moscow's interest in the subject was demonstrated in the case of Robert C. matter of concern to the authorities. Toth, a correspondent of The Los Angeles Times, who was interrogated this week in Moscow by the K.G.B., the security police, and was accused of having received, "state secrets" about parapsychology. He was allowed to leave for home after protests by the United States Government.

[In Washington, officials said the intelligence community was aware of Soviet research in parapsychology, but added that American specialists did not believe the Russians had made any unusual discoveries. One official said

developing psychological warfare methods.]

The Toth incident had the earmarks of an entrapment, in the view of some diplomats. There is no sign that the 25ed to him on the street just before he was seized contained important information. However, there is a record of Soviet sensitivity and August Stern's information indicates that parapsychology is a

Mr. Stern is a son of Dr. Mikhail Stern, an endocrinologist who was imprisoned before being allowed to leave the Soviet Union in March. August Stern said he was told before leaving the Soviet Union two years ago that an even more secret laboratory than the one he knew in Siberia had been set up in Moscow under the direction of the K.G.B.

A French scientist and former intelligence agent, Jacques Bergier, has written a book saying that extrasensory percep-

tion, one of the theories studied by parapsychology, may be used in espionage, thought control, surveillance and as a form of weapon.

form of weapon. Parapsychology covers four specific fields of nonphysical phenomena. They are telepathy (transmission of thought without use of the senses), extrasensory perception, telekinesis (transmission of motion without any evident use of physi-cal energy) and clairvoyance (the ability to see distant or future events without obviced intercention).

physical intervention). Most scientists remain skeptical that such phenomena actually exist, but there are researchers throughout the world dedicated to proving and, if possible, ex-

Formal, officially subsidized Soviet re-search in the field has gone on for years, sometimes publicly vaunted and at other times denounced and even denied.

U.S. Navy Was Interested in 1950's

U.S. Navy Was Interested in 1950's At one time in the late 1950's and early 1960's, the United States Navy and the Stanford Research Institute did experi-ments in telepathy to see whether it could provide an undetectable means of com-municating with submarines. So far as is known, the experiments failed. But owrd of them reached Moscow and appar-ently provoked high-level interest in the subject.

Robert C. Toth, Los Angeles Times correspondent, in London yesterday.
