ASSETS USED SESSION	SOURCE	TARGETING MATERIAL UTILIZED	KNOWLEDGE PROVIDED TO INTERVIEWER FOR SESSION	FEEDBACK TO SOURCE FOLLOWING SESSION	DATES SESSION FORWARDED	KEY RESULTS PROVIDED BY THE SOURCE	ANALYST COMMENTS	
C-51	29	Geographic Coordinates	Interviewer knew what was located at target coordinates.	Source was told that data he presented was difficult to match up with target area. How- ever, outside noise had made it very difficult for source to concentrate.	13 Sep 79	In-house	There was no data that appeared to be related to target area.	Because of noise factor, it was agreed that another session should be conducted at a later date.
		Requirement: Describe area located at given coordinates and give status of target located there.						
C-57	29	Geographic Coordinates	Same as above.	That there was some correlation to the target - no specifics were discussed.	20 Sep 79	In-house	Construction parts. Power transmission tower.... Two towers, a gap, one tower and it's bigger than the other two. It's an analytical guess - China. With the Y support like that.	In-house analyst: ██████████ SG1C
