CUING DATA

(S) The facilitator and viewer were provided with coordinates of the target area and directed that the coordinates represented a very large area which was almost completely covered. They were also directed that there was a need to know what was directly under the covered area as well as a need to know a description of the covering itself. There was no specific time or date reference given other than real time/day date. No other information was provided to either the viewer or the facilitator.

SG1A

*Coordinates represent a very large covered area. Need to know what is under this covered area. Also need a description of the cover!*

*No Time Fix !!*
