Memorandum for the Record

Subject: Project 1003(d)

1. (S/NOFORN) At 151200 hours October 1980, interviewer #66 informed me that in conversation with LTC Watt earlier that day, #66 had been made aware of the fact that an earlier session #66 had facilitated against a sealed envelope target had been directed against the [REDACTED] SG1A

2. (S/NOFORN) Apparently, this information was gleaned from a conversation regarding targeting for session D- #66 was told by LTC Watt to "do like had been done against [REDACTED] SG1A

When #66 asked,

he ~~had been~~ was told
the sealed envelope session.
When #66 expressed surprise
that the sealed envelope target
had been targeted against the

SG1A

 we Watt attempted to
direct the conversation against
a different session, citing
#7's earlier work against a
similar Soviet target (which
was not a sealed target
(methodology session))

3. (S/NOFORN) In summary, future
sessions (if any) against 8003(d)
must take into account that

SG1A

 has been ID'd to #66 as
having been targeted in the
past. This is an important

③

Having gestalt similarity which
is known to be associated
with this analyst in-house,
may be misconstrued to be
the [REDACTED] when, in fact, it
may not be.
