MEMORANDUM FOR ADCSOPS--HUMINT

SUBJECT: Briefing to Senator Wallop, 5 October 1983 (U)

1. (S/CL-4/NOFORN) On 5 October 1983 from 1445 - 1530 hours, INSCOM project CENTER LANE personnel provided support to Dr. Jack Vorona, Assistant Vice Director, Science and Technology (S&T), Defense Intelligence Agency (DIA) during a briefing presented to Senator Malcolm Wallop. The briefing was in the Senator's office, Room SR206, Russell Senate Office Building, Washington, D.C. Attendees were:

- a. Senator Malcolm Wallop
Chairman, Budget Subcommittee
Senate Select Committee on Intelligence (SSCI)
- b. Dr. Jack Vorona
Assistant Vice Director, S&T, DIA
- c. Dr. Harold E. Puthoff
Senior Research Engineer
SRI International
Menlo Park, CA
- d. LTC Brian Buzby
Project Manager, INSCOM Project CENTER LANE
- e. CPT Fred Atwater
Operations Officer, INSCOM Project CENTER LANE

2. (S/CL-4/NOFORN) Dr. Vorona began the briefing by stating the briefing's purpose. Dr. Puthoff then delivered his portion of the brief which included an explanation of the phenomena known as remote viewing and what SRI International has done for DIA and INSCOM. Next, LTC Buzby introduced himself and CPT Atwater

as being assigned to the US Army Intelligence and Security Command with duty station at Fort Meade, MD. (This was a deliberate effort made to impress on the Senator that LTC Buzby and CPT Atwater are involved in the intelligence application of remote viewing, and that they are assigned to INSCOM and not DIA.) That assignment is to a project known as CENTER LANE which is a project involved with the intelligence application of the process known as remote viewing. The sensitivity and classification of the project was provided. The Senator acknowledged an understanding of the classification and sensitivity. CPT Atwater then provided a summary of all the projects in the briefing book and two current NSA projects. He accomplished this by leading the Senator through the projects, highlighting the intelligence significance of each project. The INSCOM portion of the briefing lasted 15 minutes.

3. (S/CL-4/NOFORN) At the conclusion of the briefing, Dr. Vorona reiterated that the purpose of the briefing was to illustrate that psychoenergetics; remote viewing did in fact have intelligence application, and that it should be placed back in the National Foreign Intelligence Program (NFIP) to give the program the protection it needed. He requested that the Senator insert language in the Congressional Conference Report that would permit the program to be included in the FY 85 GDIP submission. The Senator replied that he is only one person, and that perhaps the briefing should be presented to the entire SSCI Budget Subcommittee. He added that there might not be a conference report because of ongoing "internal political infighting" and that the lack of resolution of this infighting might be a continuing resolution instead of an appropriations bill. Dr. Vorona acknowledged the situation, and concluded that he would welcome the opportunity to brief the Budget Subcommittee.

4. (S/CL-2/NOFORN) Senator Wallop is an important player in DoD's involvement in psychoenergetics. He is the individual who was responsible for the project being eliminated under the NFIP (GDIP) at the end of FY 82 (Incl 1). The intelligence applications of remote viewing as illustrated in the briefing book definitely impressed him.
