

SECRET/NOFORN - SKEET CHANNELS ONLY

~~SECRET~~ SUN STREAK (U)

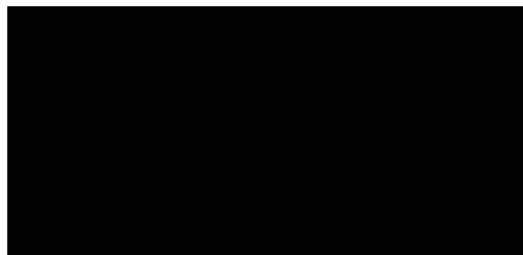

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8713 SESSION NUMBER: 6
DATE OF SESSION: 29 OCT 87 TARGET COUNTRY:
REFERENCE: MISSION STATUS:
TECHNIQUE UTILIZED: CRV SOURCE IDENTIFIER: 011

1. (S/NF/SK) Monitor Tasking: Describe the nature and extent of present activity associated with the given coordinates.
2. (S/NF/SK) Source Tasking: 011 was instructed to reacquire the object which describes an unusual path as it moves, and to begin describing it in Stage 4.
3. (S/NF/SK) Summary: The viewer's summary is attached. Note that the data and AOL's are extraordinary/similar to those reported by Viewer 003.
4. (S/NF/SK) Comments: Source 018's similar description of the object includes "metallic" outside shell and "pipes" on the inside, ruling out a "dirigible" or "zeppelin".

SESSION SUMMARY

SESSION: 29 OCT 87, 1013- HRS

There is an object. The object appears to be in motion; a flight-like motion. This object appears to have something that looks like drooping wings... that are flexible.... they flex while the object is in motion. The surface of this object is black and feels hard and gritty (AOL-like black sandpaper, or carborundum). This object appears to be very large, is somewhat pointed and cylindrical in shape. Protruding from this object is stubby, wing-like shape (see sketch, page 3). I had the impression (AOL) of looking up at a large dirigible. This object is covered with a black rubberized coating, but it feels like sand paper. There is an outstanding AOL of "STEALTH SUBMARINE" present.

Focusing on the mission of this object may have produced an AOL drive. I perceive this object originating from a very northern base (AOL-USSR), traveling through the Bering Straits, south into the Pacific ocean and then in a north-south zig-zag pattern somewhere east of Japan and West of Hawaii. See page 5 for a list of mission descriptors.
