PROJECT SUN STREAK (U)

ERV SESSION PROCEDURES REPORTWARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CONTROL NUMBER:	8715	NICKNAME:	None
DATE OF SESSION:	23 Sep 87	TARGET COUNTRY:	Unknown
REFERENCES:	None	SESSION NUMBER:	01
DATE OF REPORT:	29 Sep 87	MISSION STATUS:	Continuing
TECHNIQUE UTILIZED:	ERV	SOURCE IDENTIFIER:	003

1. (S/NF/SK) INTERVIEWER TASKING: This is the initial session of a new project conducted utilizing this Source. Specifically the Interviewer is to task the Remote Viewing Source to provide data on a specific site to include the general external and internal configurations, purposes of the various structures and objects at the site and data pertaining to the development and utilization of materials/objects at this site. The Interviewer was not made cognizant of the true nature of this site. As in the previous sessions, utilizing other Sources on this same project, the Interviewer utilized the same encrypted coordinate of "1284/6712" which is a departure from accepted protocols of two six digit coordinates. There were no indications that shortened coordinates had any noticeable affect on Source's performance in this session and that He was able to quickly adapt to this rather small departure from past procedures.

2. (S/NF/SK) SOURCE TASKING: Source was specifically told that this was a, "new target which you have not worked before. You need to know that you will be given a shortened coordinate which has nothing to do with the ultimate target of the mission and should not affect you". Source was provided any other cues or descriptive data pertaining to this target prior to the session. This session was conducted entirely utilizing the protocols of Extended Remote Viewing (ERV). *Source was tasked using coordinates 1284/6712.*

3. (S/NF/SK) INCLEMENTIES: There were no reportable incidents or anomalies which may have influenced the data obtained in this session.

4. (S/NF/SK) SUMMARY: Source furnished the attached summary which

~~SECRET//NOFORN - SKEET CHANNELS ONLY~~

~~SECRET//NOFORN~~ - SKEET CHANNELS ONLY

was prepared following the session and submitted to the Interviewer four days following the session. The completeness of the typewritten summary has been compared to the Interviewer's notes and all omissions, changes, and/or corrections have been verified as acceptable by the Interviewer. The information provided in the summary was found to be a complete accounting of the data provided by the Source during the session and did not require further modification, clarification or additions by the Interviewer. It should be noted, however, that Source provided a post-session perception including a unusual sketch of a circular object with component labels indicating some sort of pulsing light or energy device which required shielding material. This object was not objectified during the actual session and therefore, until it is formally addressed in another session, its veracity and accuracy cannot be assumed.

5. (S/NF/SK) COMMENTS: It is planned to continue to utilize this Source on this target in the near future. His data in this session bore strong correlations to data obtained by other Sources targeted against this site. In future sessions and attempt will make to gather further data on the activity within the structure and to further clarify the relationship of the post session "energy" object as well as other objects/gestalts of interest. It should be noted that Source's written summary pertaining to this session was delayed over three days due to His personal inattention and a short scheduled leave which He took following the session and before tending to His responsibilities pertaining to the preparation for this written summary. The four day delay in preparing the summary may bring His comments into doubt since it cannot be assured that the summary was not influenced by other outside factors and incidents which may have occurred on both the conscious as well as the unconscious level of His psyche. A future session will be conducted utilizing this Source at which time an attempt will be made to clarify and confirm information of a purely psychic nature and to discriminate that information from data which can be verified in His sub-conscious.

(and what they do)

Site is a structure surrounded by a very wide, sloping, open, partially grassy area, bordered on its outer limits by a wire/metal fence beyond which are woody areas. Down the hill there is a gate in the fence in front of the structure. Overall sense of isolation--both located in an isolated area and being intentionally isolated from surroundings. Next to the main structure is a smaller, rectangular one of a few levels which can be reached from the other by means of an underground access of some sort. The main structure is sloping, somewhat flat on top but with a slightly peaked roof ridge, and is located on sloping higher ground. Construction is cement or concrete. Doors are recessed, metal--it's very solid, and presents the suggestion of AOL of bunker or fortress. From above it reveals an oblong shape, seemingly with rounded off corners, with "uniform ins and outs". In some places there are pipes sticking out of a concrete pad on the ground (AOL ventilator pipes). This compound is kept off by itself because it could affect the population--a threat in a non-violent sense--i.e., proximity to it could be unhealthful, as if something noxious were involved, some sort of research and development. Climate is generally warm, fairly sunny, not a lot of rain, but nearby may be a canal or stream, with flood gates and screens. Purpose of the structure is official, secret, restricted, technology. Technology involves machines, people, proven basic designs, doing new things. Inside the main structure is a room. Red is a color of interest pertaining to this room (perhaps even the whole site). Inside the room is someone in a chair. The room is white, as is the trim. One must go up steps to get here. It's somewhat round; there are different places inside--one round place has files and controls; it's an information place, central to everything. A lot of important things go on but they are run out of here. A few people have control. This site is unique. There are either very few places like this, or this may even be the only one. It's considered to be very important to the national interest. Things can be altered here, evaluated as to their success, negative results checked, etc. What they do here is put things together--not necessarily parts, but more like combining substances to produce a new end product. In some part of this structure people are looking at things, observing; but not right in with the product--unpleasant effects occur with direct contact; but they watch how things change; heat is involved. Other activities involve a cooling area, a packaging area; careful handling. AOL of chemicals. Many of the people working here are short and stocky; some dress like civilians, but others are more uniform; they speak something different than English. They are very covert in what they do, in coming up with solutions. One man seems to be lost in thought, engrossed in reading, others are technicians, bored but careful. If they get too bored it could cause problems; there's like a chain of command, very organized--AOL, they are "like" orientals, Asians, working on something technically challenging, something they haven't tried before, which is to be used in metal containers; it's like a military 165ue--it isn't really used much but put aside in case it is needed (AOL Like gas warfare). On what seems to be a lower level that

is like a basic support area where there are pipes and other mundane stuff there is a "control area" or "control panel" behind a metal grating, with lights, buttons, switches, schalter, etc. One of the lights is an indicator telling about power, or "building up", or "capacitance"--this panel is tied into input for what is done here, with a sense of magnetism, magnetics, flux, all affecting the way things happen, examining characteristics of things not done here before. There is a consciousness of rank structure among the people working here--social rank. One rank is senior because of their knowledge. The rank and file tend to look down their noses at them. Overall purpose of the facility has the sense (possibly AOL) of being weapons related--defense/offense oriented, new capabilities.

Post-session impressions: a rounded device under thick protective transparent shielding; device looks "like" two glass tubes from an hour glass or egg timers at right angles to each other, joined at the middle, with intense pulses of light occurring inside them.
