

item no.

1. = One large complex building or several smaller, close connected structures of differing heights & shapes, primarily rectangular.
2. = Massive, concrete, steel structure of heavy construction. A sense of being "deep-down". Produces concept of "containing something". Corrosive, dangerous substance in metal objects.
3. = Rounded, concave, flat structure involving concrete construction and cables
4. = Structure which seems to be composed of several long "lines" of concrete which are low and solid and suggest somewhat the idea of "shelter" and "observing", "receiving", "viewing". Structure(s) is/are low, solid, cement, w/ thick walls + an underground component. Light color. Cool inside, long, narrow, flat, with angles. Suggest bunkers at Ft. Benning
5. = Small, hard, rectangular auxiliary structure
