PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

Control Number	: 8704
Date of Session	: 19Mar87
Date of Report	: 20Mar87
Source Identifier	: 021

1. (S/NF/SK) Tasking: See original tasking data sheet, attached. No further instructions received.

2. (S/NF/SK) Session: Several source inclemencies. Although these did not appear to be serious, monitor (suspecting a possible "story line" coming on) decided to "throw source a curve", to wit, begin session in S4, then pursue a circuitous route to the target, continuously keeping source off guard. Although this technique wasted valuable session time up front (in the absence of S1, monitor caught himself off guard trying to figure out where we were), the session did accomplish its objective--more target indicators were produced.

3. (S/NF/SK) Summary: Site is an open, barren area "in the middle of nowhere". Very strong perception of heavy construction activity and preparation--unoccupied, but ready to be used when/if needed. There are two types of manmade structures on the site: one type is flat-topped, the other has a curved surface on a flat surface. There is a radiating, emerald green associated with the area. (A bright flash may be related in some way). [Note: Source experienced much difficulty in attempting to objectify the concept of this pervading, ubiquitous "green"--light was the only (possibly correct) word-idea available]. Monitor induced source AI by placing her "in the green": Source perceived the green going right through her, producing an "invaded, weakening, dissolving, draining, light-headed, disorienting feeling" (AOL-like a "CAT scan").

4. (S/NF/SK) Feedback: (Post session) Monitor instructed source to write down any more data that she might become aware of with regard to the "green".

Future Activity

5² D AE ES T I ADL A/S

Area is very thick - heavy from civilization.
 Ground in Area is ADL like pavement.
 There is a man-made group of structures on
 the site. There are two types of structures -
 one type is flat-topped, the other has a
 curved structure on a flat surface. There
 is only one access to the Area. There is a
 road leading from associated with the area -
 clear, distinct, sterile, tasteless, intangible.
 The area has an unoccupied feel to it ADL-like
 it has been built. ~~and is standing there ready~~
 to be used if needed.

At first - I wouldn't want to be caught in
 the middle. I would feel when in the
 middle of the light - turning - It's
 going right thru. Weakening. Dissolving
 feeling. Drawing - light headed.
 Dissolving.

United. Short-term effect. Nothing
 permanently disabling.

At first -
 like a
 car sun.
