SECRET/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

Viewer 099 Session Report
Date: 17 Aug 88
Time: 0944 - 1044

AV - long, open, flat, elliptical area with scattered structures
PI - none

Summary:

First perceptions associated with the coordinates were those of 'rocket, rocket test, and tracking fast moving test objects through the atmosphere.'

[REDACTED] perceptions were associated with a very big, low, flat structure. Inside there were 'production areas'. A key concept was 'turbine engine'. One person was associated with the idea of 'power engineering', i.e., electrical power required as an adjunct to aircraft engine thrust.
