

SESSION SUMMARY

SESSION: 1 SEP88

VIEWER: OII

START: 1507

STOP: 1545

WE BEGAN THIS SESSION BY ADDRESSING THE SIGNAL LINE AS TO THE NATURE OF THE PROBLEM.

CUE: IDENTIFY THE PROBLEM.

RESULT: THE NATURE OF THE PROBLEM SEEMS TO BE SOFT, AIRY, GASEOUS, PUFFY, RISING, GREY, WHITE AND COOL. IT APPEARS TO BE CLOUD-LIKE AND IN MOTION. ONE PART OF THE PROBLEM APPEARS TO BE TALL, ROUND, CYLINDRICAL, METALLIC, AND TUBE-LIKE. ANOTHER PART OF THE PROBLEM CONSISTS OF INCLINES AND ANGLES. CONCEPTS ASSOCIATED WITH THIS PROBLEM ARE; TRIANGULAR, AS IF THERE ARE THREE PARTS WHICH ARE CONNECTED STRAIGHT LINES, OR LINES-OF-SIGHT. THERE ALSO SEEMS TO BE A DEVICE OF SOME KIND.

CUE: DESCRIBE THIS DEVICE.

RESULT: THERE IS THE CONCEPT OF A "BLACK BOX". THERE IS SOMETHING ANGULAR, PRISM-LIKE, ACTING AS A MIRROR, REFLECTING SOME SORT OF ENERGY, OR BEAM (AOL - LIKE A RADAR REFLECTOR). ALSO ASSOCIATED WITH THIS DEVICE IS THE IDEA OF RECORDING DATA.

CUE: DESCRIBE THE END RESULT.

RESULT: THERE IS SOME SORT OF ENERGY, OR VERY NARROW BEAM THAT IS AIMED AND FIRED AT A PRISM-LIKE DEVICE. THIS DEVICE HAS PRECISE, CRITICAL ANGLES AND SEEMS TO AIM/DIRECT THIS BEAM TO A TARGET. THERE MAY BE GREAT DISTANCES INVOLVED AND THERE IS A FEELING THAT THERE IS LITTLE MARGIN FOR ERROR.

Pls - none
AVS - none

1 SEPTEMBER 88

angles
incline

hard

triad
triangle (like three parts to something)

~~light line~~
~~line-of-sight~~

~~face~~

DEVICE!

black

~~black box~~

FUNCTION!

angular

~~two part~~

~~mirror (as in to mirror something)~~

angles
corner

coming together

like radar reflector

~~BLACK BOX!~~

break

like data recorder

AOL
like same
purpose of black
box in aircraft

seismic
data
readings
recording

LIKE RADAR REFLECTOR!

4 1/2 angles are important -

~~prism like~~

~~beam splitting~~

END RESULT!

AOL SKETCH

$4\frac{1}{2}$ - prismatic mirror device used to direct a laser-like, very powerful, particle beam - can be used to "kill" or disable satellites in orbit
