Area A consists of a large structure perceived from the inside with levels (railings, walkways) at intervals up the wall. White, pale green, red, white, and black are colors associated with the Site. The structure seems taller than it is wide, is open, wide, voluminous, spacey, and is full of loud, echoey sounds, and industrial equipment, including lifting devices "like" traveling cranes. On the floor is a large, roughly cylindrical object with lots of wires that suggests windings that is some sort of heavy duty component for an even larger device. It is large, bulky, metallic, and will be moved from its present horizontal position to a vertical one and will be fit into place.

Area B is empty, light blue, low, dim, empty, with seats and furniture. It is needed from time to time for various purposes. It involves congenial lighting, and has a curving, doming ceiling. There is a pleasant, relaxed atmosphere here that reminds me of a meeting place or a conference area.
