REPORT OF REQUESTED INFORMATION

WORKING PAPER

Project: 9041
Date: 900628
Time: 1355-1441
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

SG1A

1. There was a very vague indication that the ~~SECRET~~ may have been located in the area of the Virgin Islands/British Virgin Islands at the time Source was interviewed. No definite location was found, after repeated searches. This may be due to the information in item 3. below.
2. There is illegal contraband in the form of drugs located in the rear of the ship, in the lower portion (hold?). There are 1 or 2 large "tanks", similar to large butane tanks. At least the front one contains drugs, and there is an indication that the rear one does, too. The tanks have a smaller tank welded inside a larger one. The smaller, inside tank contains liquid, and the area between the inner and outer tanks contains the drugs. The tanks are of very heavy gauge metal and will have to be cut open to get to the drugs.
3. Information appeared during the interview indicating that this shipment may have associated with it, an experiment on the part of the drug smugglers to devise a defense against our specific type of detection (See transcript for details).
