876). About a thousand of the lizards—largest in the world—survive on four tropical islands: Komodo, Rinia, Padar, and the southeastern corner of Flores. Hoping to save *Varanus komodoensis* from extinction, the Indonesian Government has proclaimed part of Rinia a dragon sanctuary and has restricted export of the giants.

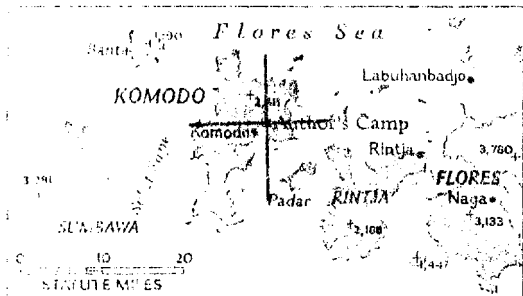

CPYRGHT

Lizards of Komodo

Gleam of gold on the hide of a newly hatched Komodo dims with maturity. "The 2 1/2-inch baby weighed next to nothing," said the author. It coiled inside a shell the size of a goose egg.

Realm of the dragons: Green tone shows the giant lizards' tiny kingdom.
