Site is a group of structures of many differing sizes and shapes; ⁱⁿ dimensions in general seem quite large in scale. Site is dimensionally complex, involves numerous colors, but especially muted ones such as ~~various~~ various shades of grey; roundness is a dimensional characteristic of the site that seems to be of some special significance.

In June of 1981 a large, ~~grey~~ ^{grey +} white, self-luminous, cold, dead-like formation occurred; this "cloud" covered a very large area in all dimensions, and had greater consistency than the surrounding atmosphere. It seems to "roll into itself," ~~to~~ and to attenuate gradually, though it maintained self-cohesiveness. It manifested an impersonal, Amotinal EI aspect; there was a purposeful element involved with it.
