

30 SEP 86

SESSION SUMMARIES

MORNING

SITE 1.....FACTORY

..... Still having problems identifying man-made structures/
complexes..... all elements of site were identified during the session
but viewers' ^{ANALYSIS} interpretation of the site was ^{OVERLAPED} blocked by AOL..... Especially
stage I gestalts..... Stage II's were much better..... crackling sound.....
..... burning smell..... warm, hot..... sandy, gritty..... angles.....
AOL of volcano..... if this were a steel mill the AOL would be very
apropo..... A. I. - do not want to taste..... hot, burning
sensation.
