Site involves a group of "Volgh" individuals demonstrating a military & paratilitary feel, & are preparing to perform some sort of action. Involved in the action is the concept of ex-~~+~~ infiltration (see page 20).

They are located in a "cantonment" area which has been converted from something for this purpose. Their intentions involve "critical nodes," (see St. V on p. 16, 17) & requires planning & much outside information & details for success.

Many apparent crates, cylinders & boxes ~~are~~ are stacked in the area, & seem to contain supplies & munitions, including lots of explosives & food & camera gear & etc. ~~Event~~ Event appears to be "scheduled" for sometime toward the end of the next week & a half.
