SI D AI EI I ASL Als

54 1/2 person on top intent + working on object. It's dark lights shinky on, but limited. Desire not to draw attention. Night masking.

people is a group "crew"

54 1/2 sense of urgency - have to be done by certain time. couldn't start until certain time, so time available severely limited.

54 1/2 during event most people move away. at least one person is inside or closely associated with object.

white

noise

54 1/2 object is started, brought up to speed, "performs, then is brought down and stopped."

leaving ^{partial} framework behind where solid used to be.

controlled

5/2
very
budget

Small
brief

5 1/2 course of effects from source to target not visible. Only effects at target.

5 1/2 object resting on flat play. Crackling sound shimmer. No people around. Some of vertical oblique perspective from air.

5 1/2 doesn't seem to be line of sight

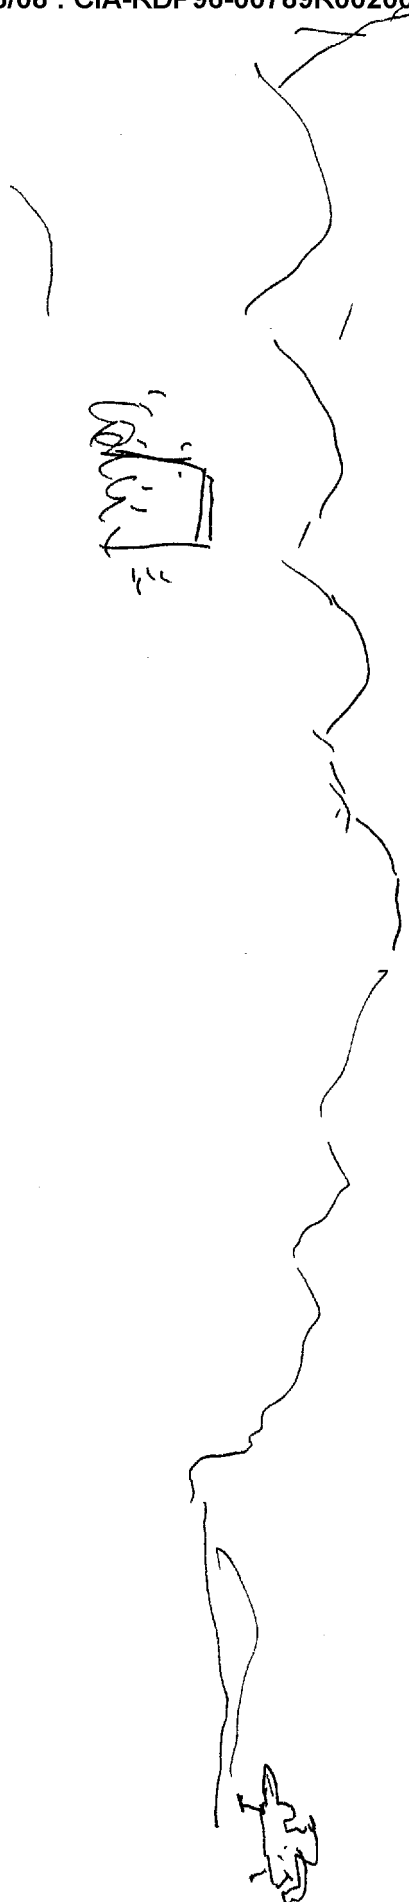

uncertainty

distortion

5 1/2 waviness, wavy, pulsing + pulsed of minute components i.e. "indivisible" Small bend but aggregate effect is extreme. Some directability but how and how precise uncertain since some effects are not visible

5 1/2 ~~how~~ people feel how a person would feel when viewing a successful CRV session for the first time. Though session not perfect + provided some mixed results, the fact that it worked made people ~~settle~~ "exhilarated"

AS

5/1/2
Since that operational test occurs/occurred ± 3-4 months from now.

perceived effects of object on target start from bottom and go up (though may not always happen in this direction), intense, bright "magnesium-like" Sparkings. Above Sparkings target structure in fact & normal.

Below Sparkings structure target is "all melted up." Puffs of dust? smoke? debris? erupted around target at initial engagement.
