shock waves

pressure  
concussion

AS PROB  
pressure on the ears  
is painfully unbearable

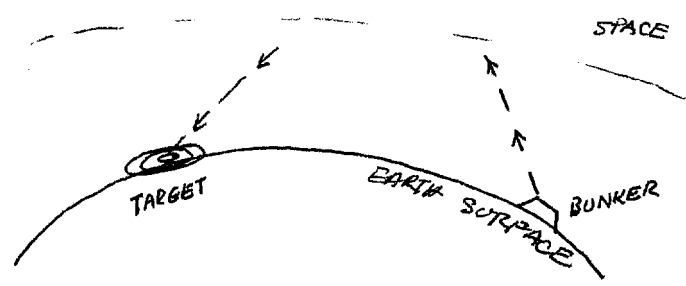

There is a brilliant white flash and a terrific shockwave that spreads out at ground level. Not perceiving anything like a typical explosion, however. It's like an explosion, only it's not.

*reminds me of Tunguska Incident*

break

UNSURE  
APPREHENSIVE

HAPPY  
RELAXED  
CONFUSED!

4 1/2 - as if a relief from pressure / the stress of uncertainty  
 However these people seem rather "confused" over the results,  
 as if the event was not a total failure, but something unexpected,  
 unusual, or confusing results.

EVA 0934hrs

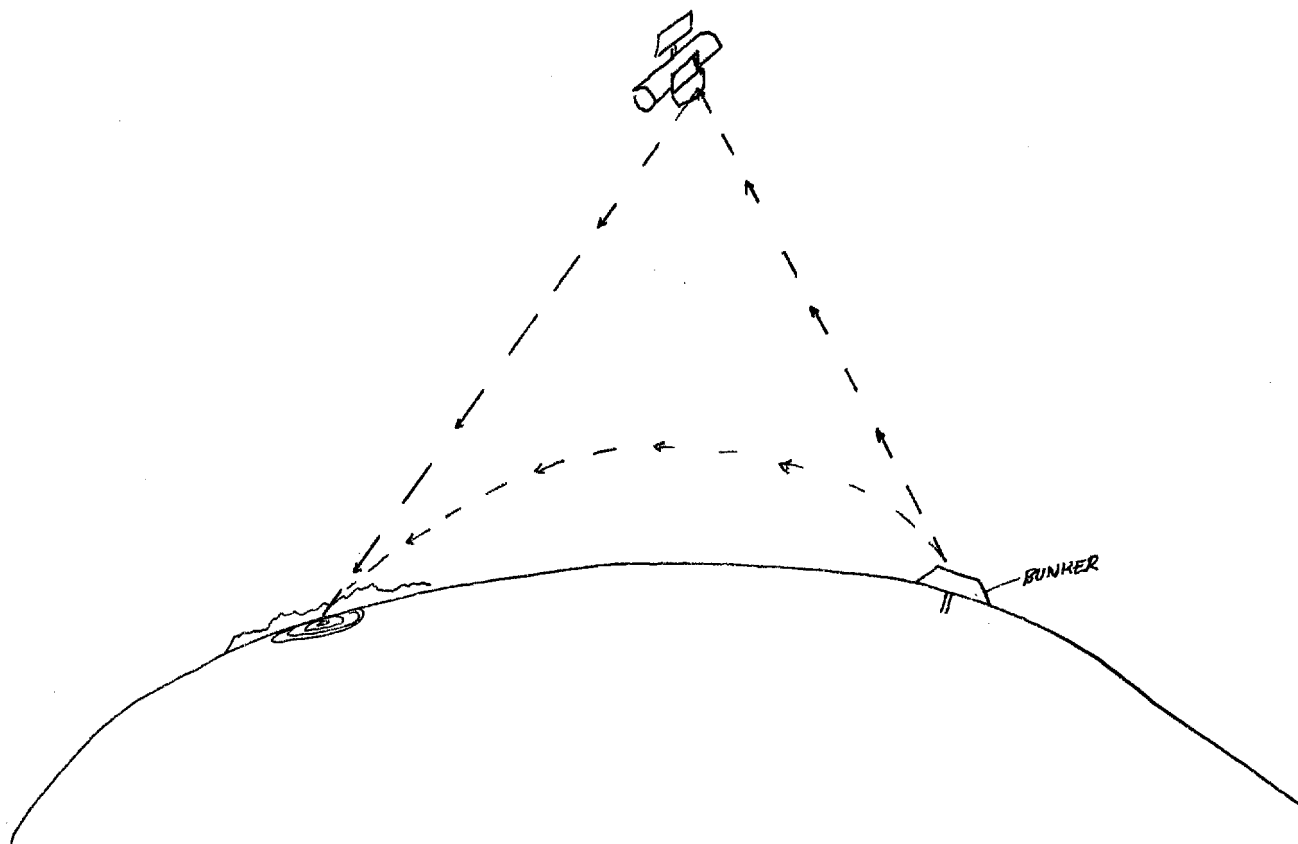

Whatever creates the pressure shockwave (I'm not sure whether it is a solid mass or mass of energy) ~~does~~ causes the effect at, or just above ground level. The shockwave radiates out at 360° from the ground zero. The pressure change is incredible, causing severe pain to inner ear.

POST SESSION

7 MAY 81

1430hrs

Received impression that <sup>something</sup> originating at the bunker was bounced off satellite to target. But still feel that the object itself follows the path of an arc. I also have the feeling that the object leaves the atmosphere and then reenters it somewhere along the arc.
