

Project "M"

Interviewer/Monitor Tasking

Describe the vehicle(s)

182478
836131

Note: In the envelope are photos, sketches and descriptions.

Ops Note: Expand on viewer's description, as much as possible. Explain the vehicle(s).

Set vehicle has something to do with it. Vehicle + brightness are "remoted" from each other. Vehicle is in open but "set up" to operate, + is near ~~edge~~ or among large vegetation. Wires around vehicle. POB's "ground plane" for electronic type

5+1/2 caged lights; fixtures; brackets; pioneer tools; vehicle set up for ops
under ~~factory~~ ~~type~~ ~~type~~ conditions if necessary:

Arms, cones,

etc. made for function not appearance. Attempts are made to shield it from observation from above, + it is made to look like something other than it is if seen from the ground. It is kept at a distance from all but those closely associated with it to avoid possibility of close ~~to~~ inspection by those unauthorized. It is not intended for extensive movement. It goes where it's needed, then stays in place while operating. Contains lots of equipment - mostly electronic in nature. Part of its purpose requires communications, initialization, monitoring + plotting. Vehicle seems to be involved with some sort of activity involving a sudden intense "very bright" with associated loud, continuous sound + vibrations. Vehicle + source of "flash" are "remoted".
