

Project "M"

Interviewer / Monitor Tasking

Describe the vehicle(s)

182478  
836131

Note: In the envelope are photos, sketches and descriptions.

Ops Note: Expand on viewer's descriptions as much as possible. Explain the vehicle(s).

Committees

S4 1/2 - Concept of "haze" umbrella & envelope (non-physical) connected with equipment. Purpose is to "cut off" or "confuse" what happens inside "envelope" from knowledge of others outside envelope.

S4 1/2 Concept of vehicle - towed to location. Set up on outriggers, and leveled/balanced/calibrated to be put in operation.

S4/2/A/S Impression it is Soviet, deployed, but may used in  
training + ops testing. Not allowed outside Sov. Un.  
because want to keep it "under wraps" yet a while.

Equipment parked <sup>connected</sup> ~~at~~ site involves an electrical/electronic apparatus towed behind vehicle until operational site reached. Then, "jacked up" on "outriggers", leveled/adjusted/calibrated for operation. Purpose of equipment to produce a <sup>huge</sup> <sup>hundreds of km<sup>2</sup></sup> shielding "envelope," a "umbrella" which ~~is~~ cuts off "air" <sup>waves</sup> "carries" what goes on inside of "envelope" from awareness of those outside of it. Device is ~~connected~~ connected to vehicle system. Ideas of "artificial aperture; electromagnetics and "synthetic" are involved with equipment.
