

Problems / Considerations :

- 1- Missions from Jan - Apr 1950 have little or no feedback from customers
- 2- Typed, final copy analyses / feedback from JTF-4 not included in most of operators files - I know they were done - I read most of them!
- 3- Many tasks from JTF-4 could not have feedback since we were essentially supplementing their data base files (particularly on targets dealing with personalities, docking facilities, compounds, etc).
