## S.S. ACTIONS REQUIRED:

### 1. EVALUATIONS

- complete all ops, OTIC, assessments, other...
- assess relevance, significance, implications, reliability, qualities...
- Set of procedures to facilitate future evaluations
- Develop rationale for ops status, CIM status, etc.
- Refine evaluation methodologies, procedures.
- ident. future needs.

### 2. OPERATIONAL TASK INTERFACE

- Activate IC task coord/review group on regular basis
- Increase internal DIA involvement (select mem., struct need-R. how)
- Develop comprehensive set of ops, OTIC asst, other. (ods etc..)

### 3. TECHNICAL ISSUES / TECHNICAL INTERFACE

- INCORP. word-wide research findings, esp. SRI... , or appropriate/possible.
- maintain strong real-time link with SRI / SGRD R/D...
  - joint projects (dist effect, other)
- Review Tech reports...
- report Tech (ops?) limitations
- ident(?) key variables (from ops data, from R/D...)
- eval. the targeting issue (what/who is being attacked? How to improve contact)
  - env?

3. TECH ISSUES / INTERFACE, CTD:

- Review clear def. of operations, qualifications. what % rel. can be expected, why? use of res., etc.

4. PROJECT / PROGRAM ISSUES:

- Screen / select at DIA, elsewhere (rev. cautious procedure.)  
- How to? Rev. Plan procedure -  
steps... interface with SRI "Test"
- Identify candidate people  
- questions...  
- interviews...
- Review meaningful 'Test' / achieving target tasks/procedures.
- Review overall protocol, procedures (review, improve)
- Review clear definition of "needs" (what should S.S. try to achieve, accept as tasks...?)
- Staffing issues:
  - keep eye open for pot. difficulties
  - anal. group balance
  - focus - y with prev. members..
  - Review new possibilities..
  - mental requirements

50 DEVELOP NEW CAPABILITIES

- in conj with STR /SGRP (??)
- CANDIDATE TASKS/PROJECTS
  - SEARCH (Refine) -- ANALYTICS? / SCALING? / ?
  - PRE-COG.!
  - RA.(?)
  - TIF name: (no. for debrief/eval, ..... )
