- E. SESSION SUMMARY:

The target consists of moving shapes in water. The purpose of this seems to be for study, research, learning, and understanding (possibly biology). Trust seems to be an important part of the study.

There is at least one person in the target area that is wearing some type of underwater equipment (possibly scuba gear) with a helmet. However, there are more shapes in the water that are moving. There is also some type of structure, see sketch.

It is possible that this target has something to do with "sound in water", (such as working with dolphins, and/or sonar).
