MAIMONIDES MEDICAL CENTER OBSERVATIONS

- Vivid, potent, dynamic material is best
- Must be relaxed, passive with increase of inner attention
- Female participants are more sensitive to colors
- Rapport, bonds, emotional ^{ASPECTS} ~~tones~~ important
- Motivation, goals are important
- Openness, self-acceptance is important
- Waking PSI experience is not important

RESEARCH EXAMPLES

Ruins of Urquardt Castle, Loch Ness, Scotland

Perception (in full):

"rocks; with uneven holes; also smoothness
height
ocean—dark, dark blue
whitecaps
waves; booming against rocks?
on mountain or high rocks overlooking water
dark green in distance
gulls flying?
pelican on a post
sand
a lighthouse?—tall structure—round with conical roof
high windows or window space with path leading up to it
or larger structure similar to a castle
[Here there is a sketch of a castle abutment on the transcript.]
a black dog?
with longish curly hair
old, unused feeling; fallen apart?
musty or dank
moss or grass growing in walls
drawbridge?—wood
ocean smells
[Here two sketches show the rocks and castle separated by water from the
dark green in the distance.]
flowers?
snow ice—capping a mountain?
high large, cavernous hall—castle"

Danube River, Bratislava, Czechoslovakia

Perception (in part):

"I have the feeling that [the agent] is somewhere near water. I seem to have the sensation of a very large expanse of water. There might be boats. Several vertical lines, sort of like poles. They're narrow, not heavy. Maybe lamp posts or flagpoles. Some kind of circular shape. Almost like a merry-go-round or a gazebo. A large round thing. It's round on its side, like a disc, it's like a round thing flat on the ground, but it seems to have height as well. Maybe with poles. Could possibly come to a point on top. Seeing vertical lines again. Seems to be a strong impression, these vertical lines. No idea what they could be. . . . A definite sensation of being outside rather than in. Water again. . . . To one side of where [the agent] is I get the feeling there's a kind of small building. Could be a shed. . . . Predominant colors seem to be blue and green. . . . Water again. Some very quick impression of a fence, a low fence. . . . Steps. I don't know where they're leading to. . . . The steps sort of lead up to like a path or walkway. Like a boardwalk. And there's a fence along it. There's people walking along it, and there's vertical lines along that walkway. . . ."

J.B. RHINE'S OBSERVATIONS

- Most subjects can do clairvoyance, telepathy
- Daily fluctuations occur
- Drugs, coffee affects
- Works at a distance
 - Performance increases noted
- Rational, sensory processes interfere

Approved For Release 2001/03/07 : CIA-RDP96-00789R002600300001-0

J.B. RHINE'S OBSERVATIONS

Cont'd

- Abstraction, "concentration" required
- Major procedure changes disturb
- Conflict of purpose spoils concentration
- Self-consciousness lowers results
- Dissociation lowers capacity to concentrate
- ESP use over time does not decline
 - May be cyclic
 - May be below chance for negative attitude

Approved For Release 2001/03/07 : CIA-RDP96-00789R002600300001-0

J.B. RHINE'S OBSERVATIONS

Cont'd

- Interest, effort, attention cause variations
- Light humorous mood best
- No evidence of further development after brief initial period

Approved For Release 2001/03/07 : CIA-RDP96-00789R002600300001-0

J.B. RHINE'S OBSERVATIONS

Cont'd

- Best results when both "sender and "receiver" have talent
 - Even if the "sender" is fatigued
- Results somewhat positive, even if the "sender" has no talent
- Poor results if "receiver" has poor talent, even with good "sender"
