KEY INTELLIGENCE TASK (91007)

SG1B

(S/NF/LIMDIS) Describe activities and purpose of target area; provide backup sketches. [REDACTED]

(S/NF/LIMDIS) Source A Assessment. (DOI: 23 JAN 91):

a. Site function is associated with unusual emanations and has numerous automatic functions:

- High technology diagnostics.
- Emanations may cause physical maladies (i.e., nausea, headaches). ✓
- Flashes of blue are relevant. 2

b. Object/equipment associations include:

- Large pyramid or peaked shapes (Figure 1), with humming sounds and spinning motion.
- May be flaps on the object. 2
- Bars and disks are also present, with rings (Figure 2).
- Many disarrayed thin elongated objects are present.

c. Overall area is flat with features incorporated into very rugged terrain.

(S/NF/LIMDIS) Source B Assessment. (DOI: 23 JAN 91):

a. Function is associated with storage and loading, possibly with underground aspects:

- May have chemical munitions.
- Shaking and vibration motions are associated, with some circular motion.
- Ceiling may have a sliding/opening capability, and may be made of very thin metal.

b. Main object(s) have missile-like shapes. ✓

c. Various smaller objects have fan-type shapes (Figure 3).

Appendix B

(S/NF/LIMDIS) Source C Assessment. (DOI: 23 JAN 91):

a. Main function seems to be related to mines:

- Possibly mine assembly, mine/staging deployment.
- Mines seem to be of a shallow surface type.

b. Main site area is heavily dependent on a river or some type of water supply, though it is not near a river.

- Area may have a natural mining function or once was a mineral mine.
- Some association to "mile" or "nile."
- Area is in a Mideast country.

A. Are the assessments accurate? (circle response)
