QUOTATIONS

"When a scientist states that something is possible, he is almost certainly right; when he states that something is impossible, he is very probably wrong."

...Arthur C. Clarke

"This talk of going to the moon is all rot, and space travel is utter bilge."

...British Astronomer Royal, 1958

"But to place a man in a multistage rocket and project him into the controlling gravitational field of the moon, where the passenger can make scientific observations, perhaps land alive, and then return to earth ... all that constitutes a wild dream worthy of Jules Verne. I am bold enough to say that such a man-made moon voyage will never occur, regardless of all future scientific advances."

...Dr. Lee deForest, 1958

"Science is not always what scientists do."

...Dr. J. Allen Hynek

"They laughed at Fulton; they're laughing at me. Therefore, my idea is as good as Fulton's."

...Adapted by Dr. Bob Wood

"Eminence does not necessarily correlate with significance."

... Dr. Otto Schmidt

"A genius is a nut whose ideas were proven correct."

...A University of Colorado History Professor

"While prudence is the mother of security, it is on the audacious that fortune smiles."

...Lee de Broglie

"I been readin' bout how maybe they is planets peopled by folks with ad-advanced brains.....on the other hand, maybe we got the most brains.....maybe our intellects is the universe's most ad-advanced.....either way, it's a mighty soberin' thought."

...Walk Kelly (Pogo Comic Strip)

"The story of unidentified flying objects is the story of credible people seeing incredible things."

...Dr. James E. MacDonald

"Creativity is to see what everyone else has seen and think what no one else has thought."

...Charlotte Wood

"I have never met an informed skeptic."

...Dr. James E. MacDonald

"The more eminent you are the less you feel you have to read the literature in order to say something about it."

...Dr. Bob Wood

"Just because you are paranoid, doesn't mean they're not out to get you."

...Targ & Puthoff

"The essence of science is doubt."

...Richard P. Feynman

"More harm is done to the progress of science by skepticism than by gullibility."

...Dr. Bob Wood

"Anything which is not prohibited is mandatory."

...Murray Gell-Mann

"Any sufficient advanced technology is indistinguishable from magic."

...Arthur C. Clarke
