SUMMARY OF INFORMATION.

The target is a large, wide, long commercial shipping vessel owned by a large company (several vessels). It has a high, rounded bow, one mast, and a superstructure ~~bow~~ in the aft portion. Vessel is currently moving in a straight line towards its destination in an ESE direction. It is working under a delivery time-table and needs to reach port on a specific date.

This vessel has been strongly involved in narcotics trafficking (large amounts) in the past. Executives of the vessel's company are knowledgeable of its involvement.

Vessel is currently on a "clean run" (purposefully so). It is not involved or planning to be involved with anything before it reaches its destination. The vessel is in communication with other entities.

Vessel has no contractor on board.

ASSOCIATED WITH THE CUIING is a large,
Barge type vessel with a dark hull and white
superstructure in rear.

FUTURE ACTIVITY OF INTEREST:

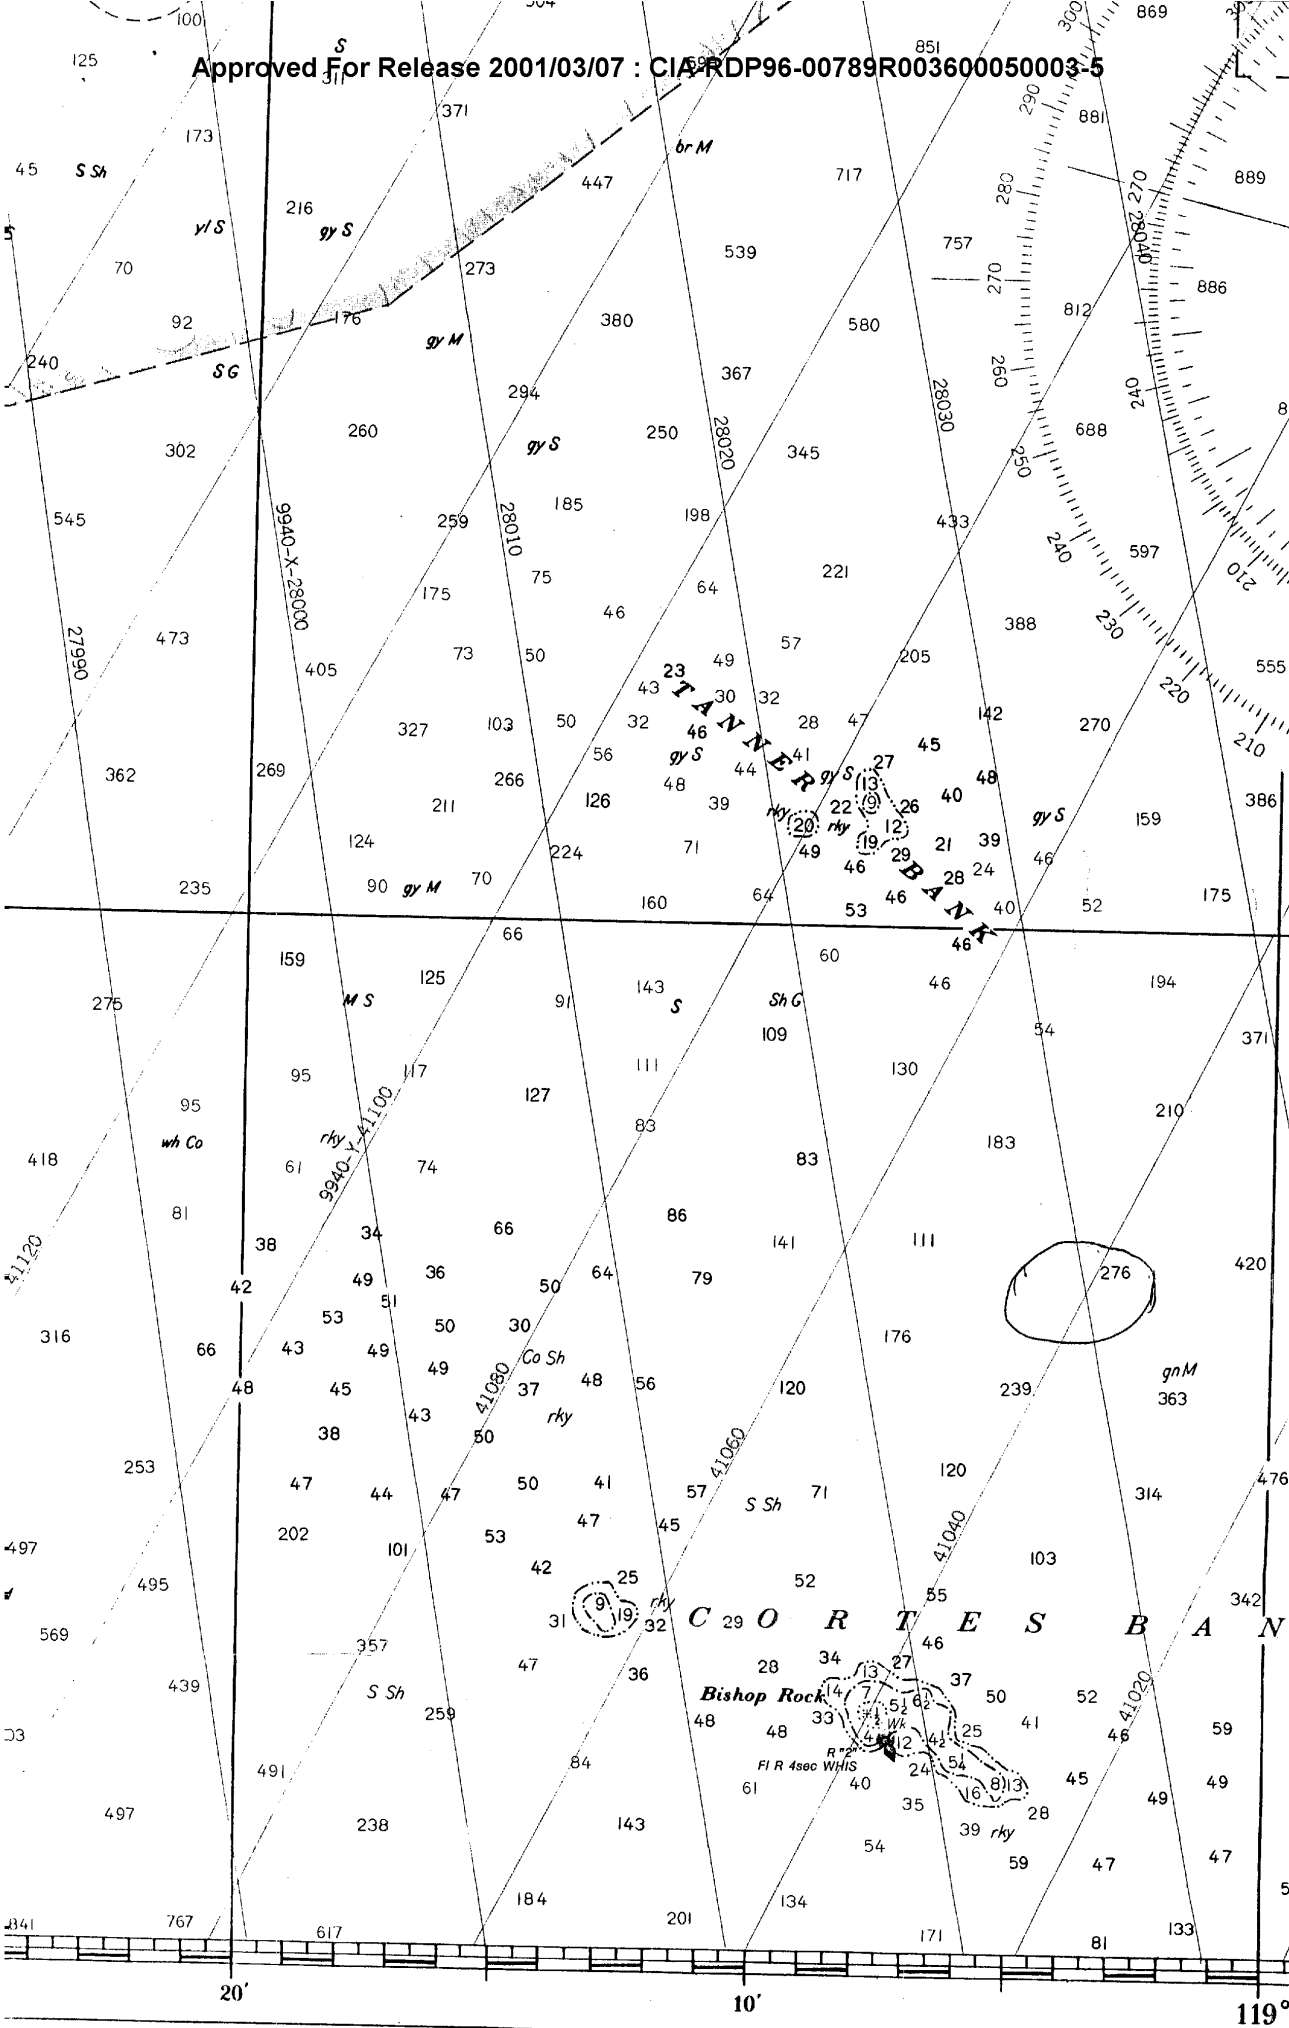

This was pursued using two separate methodologies.

One gave the result of : 19 Jul between 2001-2200 hrs local
time
at location marked on map.

The other method produced no results.

I AM CONCERNED THAT ~~IT~~ THERE MAY
NOT BE AN ACTIVITY. ~~REASON~~ My concern
is DUE TO THE LACK OF CORRELATION
between the two methods AND the lack of confirmation

on the vessel / found,

has been designed to promote safe navigation. Tho

[Contractor]

No.

[current involvement?]

5 1/2. This is a "clean run." Presumably so. Not involved in planning to be involved before it reaches destination. However; get a strong of past, large involvement + that Company bigwigs are knowledgeable.
