S 4 1/2 What these people want isn't relevant to the people  
keeping the records. Viewed as interesting + means  
to an end. Callous, bureaucratic feel to whole  
operation. Clinical, detached, a-motivated

Secrets

S 4/2 outside world doesn't generally believe, or  
really that they exist.

subject is "fanned out"

not released  
some detail

~~Approved For Release 2000/08/09 : CIA-RDP96-00789R003700500002-5~~  
 1st floor in area 2 is full, walls or floor grey, door  
 connects structure w/ small regular windows, maybe barred, fairly  
 surrounded by chain link fence of barbed-wire top + lights. old

2<sup>nd</sup> floor has long hall, green floor, person at desk  
 controlling access to one area. Offices. Room containing  
 many files. Records deal w/ people present at site. 2 overall  
 groups - subjects, + others produce + keep records. Records  
 keep track of progress of subjects individually. Show progress +  
 regress during procedure, until final termination when subjects  
 are either "dead" or "fanned out" to a holding area where  
 they stay indefinitely (like being in retirement, a nursing home,  
 + a mental hosp. all in one.) Subjects never leave system altogether.

Procedures involve energy introduction to subject, which  
 either incidentally or intentionally causes pain. Observers/record  
 makers expect this, are not inhumane or cruel, but are  
 also not veneficial or empathetic; they are detached, interested,
