→ FOCUS ON THE OTHER IMPORTANT PAPERS

~~SECRET~~

★ Simple, simple codes, simple coding, BUT NOT TOO many, I think these are sent in here but not very important - NOT DIFFICULT - EASY TO UNDERSTAND, MOST OF THE PAPERS DEAL WITH WATCHING OTHER PEOPLES, How other people live, This area has a lot of stored information - where people can do research, much bigger than other place - I keep picking up a study of Black people

→ Tell me about the study

★ THEY DON'T WANT TO help - NOT A take over hunt - BEING OBJECTIVE - some types of mountainous areas - NOT STUDYING people as a whole - STUDYING EACH group - NOT how they eat not how they dress - NOT looking at sociology but more like a puzzle - putting each group against each group - looking out from their own interest - They supply things here -

→ BACK TO THE room - more important papers -

★ Building foundations, networking, A lot of the papers are a lot of CRAP - even the codes are ~~crappy~~ - I'm looking around - High maps hung and they take these papers and work at the maps - ~~there's a very~~ the papers are provided through a system, then there is a sorting out, there technical data around this place - This whole area gives me a feeling of just watching

→ Pause - focus now on these maps - describe the area of the world the maps depict -

★ A high map - massive green area - I would say ~~Africa~~ - SUDAN - that's all -

ENOUGH NOW

I first sensed the large structure. I could feel it being square, tall, and hard. I could sense the entrance being circular and a sliding back and forth to enter.

SG1B

[REDACTED] - This was a small area with men working over a table. There was an ~~ob~~ art object to the left and elaborate cabinets that contained papers. The work was super sensitive and there was a man in charge. I could sense this man ~~is~~ owned rich possessions - elaborate paintings. I sensed this man wore a uniform with a gold sash. I sensed that the work here dealt with deep penetration and was underhanded. It was unbelievable. The idea or concept is not new but the idea that it is still being done is not known and this is shocking. I sensed that the work involved an area of people ~~not~~ located not here. I went to that area and sensed tribunal or trials. I sensed direct dealings - not propaganda. I sensed papers with dates - Dec 12 and Jan and Feb. I sensed the

Paperes had something to do with meetings and flight schedules. When talking to the man in charge, he said he wanted to be in charge of something bigger. He felt there was a lot of wrong doing in the past and he could better. I felt there would be a fall and then would be people placed in positions and then would be an upshoot.

SG1B

I sensed a much larger office
 I sensed I was in a news room.
 I sensed people talking, they were younger people and happier.
 There were rows of desks, cabinets with papers, and there was a large map on the wall. These people researched many many things. I sensed statistics on vegetation, land, con, industry. They could be called on to answer any question at any given time. I sensed that some type of system. The papers

here contained a study. I
perused it dealt with black
people. This study dealt
with looking at groups of
people and to find out where
they were located and to
find out where this organization
could get the most benefit. I
perused the map was of Sudan?
