MEMO

22 March 1995

To: [redacted]  
From: Ed May  
Cc: Betty Muzio

Our contracting officer, Ms. Betty Muzio (703.734.4074), talked with [redacted] [redacted] DIA's Contracting Officer for our contract only to learn the AI has not contacted her with regard to our computer equipment.

As a result, the following will take place next week: All the computer equipment will be shipped back to DIA prior to 1 April. Since we are exempted from shipping software, these computers will have no software on them at all.

The consequence for my ability to support you and any further technical questions becomes quite problematical and all on-going analysis of our EEG data stops. (This analysis would enable me to more wisely suggest what the next brain research makes sense.) Thus, if we are asked to continue with research/applications our time to be productive significantly increases.

The above actions are the default case. Unless we hear officially from [redacted] the issue becomes moot next week. (I just had a call from the defense person who will come to retrieve the equipment after I return from the East Coast in the first week of April.)

I have been unable to reach [redacted] today, but I will keep trying.

Did you hire an assistant? Do you want him to meet me in Washington next week?

[redacted]

Regards,

Ed
