Dear [Redacted]

STAT

Enclosed is a note which outlines the analytic structure of the project as we currently conceive of it. I direct your particular attention to the analytic categories and the matrix of case possibilities on page 3. We also spell out the first five cases which I believe Greg and you have discussed briefly. We are about to begin work on several of them and would welcome your input and guidance.

We just met with one of your contracts people for the pre-award audit. I think all went smoothly. I think we're finally getting this ship going!

Sincerely,

Peter Zimmerman
