30 Sept. 1970

MEMORANDUM FOR: Capt. Bruce Greisen
SUBJECT: Results of Photo Comparison
Case No. 12221
REFERENCE: DIA AF XXXXXXXXXXXXXX 365-8-1-70-INT
Photo No. #61

1. The following report contains the final results of the comparison between the unidentified photo and the enclosed photo submitted by your office:

Major Charles R. Connor, USMC:

Consensus opinion by three identification technicians operating independently of each other is that Major Connor is not the subject of photo 61. The most important datum seems to be the difference in mandible conformation (see attached sketch). Observed

Build and morphology	similar	Mouth shape	possibly similar
Hair style	similar	Face shape	dissimilar
Nose shape	dissimilar	Chin shape	similar
		Orbicular development	techs. not agreed

As always, the poor quality of photo #61 makes any positive statement of identification difficult. Photo 61 has now been identified by [five] NOK.
