PERTINENT INFORMATION

14. **2. Re CHALK: WHEEL notes in Letter No. 1 that COMPASS states that CHALK will "have had it at night" if he throws a package over the wall. SLEDGE requests that COMPASS detail the reasons why COMPASS feels that the wall site would be bad or unsuitable. Is there 24 hour DRILL on Turchanin Ulitsa? Is the DRILL mobile or fixed? If there is 24 hour DRILL on Turchanin Ulitsa, then, presumably, the window site would also be compromised. SLEDGE remembers the basement window site, but wonders how CHALK could pass a packet through the closed window or can they be opened so that the packet could be pushed directly into the dining room? Could, as COMPASS states, CHALK actually toss a package through the window from the sidewalk or would CHALK have to step off the sidewalk to approach the window, bend down, and insert the package through the bars and window? This window site sounds as though it might have possibilities. COMPASS should case and study in detail this site and compare and make a careful evaluation of whether the window or wall would be the better drop site for CHALKS security and for COMPASS'. Moreover, if COMPASS holds that both neither site is suitable, he should not hesitate to state such together with detailed reasons for rejecting the proposed site. If the JIG site is rejected, it will be incumbent upon COMPASS to locate and detail an alternate site filing the measurements requested by chalk; i. e., 8 1/2" x 5 1/2" x 1/4". WHEEL would appreciate sketches and inside photographs (if possible) of the window area. COMPASS should be able to borrow CHISEL's or a friend's camera over night for use in taking some inside shots. WHEEL would also be desirous of having photos taken (from inside the courtyard) of the proposed wall area and immediate courtyard vicinity. COMPASS could use the puppy as an ostensible subject and reasons for photographing this outside area. As soon as possible, COMPASS should, after dark, attempt to walk down Turchanin Ulitsa toward the river and try to ascertain the presence of fixed or mobile DRILL--especially in place in front of him along Turchanin Ulitsa. If possible, this should be done several times, and since COMPASS resides at JIG it will be viewed as a normal route to JIG from SQUARE.**
