1. Headquarters' attention is invited to an article appearing in the Paris edition of the New York Herald Tribune, 25 January 1956, entitled "Dr. Urey to Oxford". The article indicates that Subject has been named Eastman Professor at Oxford University for the coming academic year (presumably 1956-57).

3.

The only other information on our files which could be construed as adverse is a report in the press of 14 February 1955 and date-lined Chicago to the effect that UREY had expressed his views on the SOBELL and ROSENBERG cases; these views seem to have coincided with the official Communist line on the subject, but were such as might be held by non-Communist members of the public".
