

1528

APR 5 1951

TO: Director
Federal Bureau of Investigation
Attention: Mr. C. D. DeLoach

FROM: W. G. Wynan
Assistant Director

SUBJECT: Julius ROSENBERG, et al
ESPIONAGE - R

1. Reference is made to your memorandum of 7 March 1951 entitled as above.

2. This office has no positive indication of Soviet efforts to develop a nuclear energy propulsion unit for aircraft. However, it is known that the Russians have an extensive laboratory program and competent technical personnel; consequently there is no reason to believe that they are not attacking the problem of a nuclear energy aircraft engine.
