

MONTHLY REPORT
NHA TRANG
JAN. - 1969

GENERAL

This month started off with a bang with porter 48N losing its engine and ditching in the ocean at Cam Ranh Bay, happily there were no injuries and part of the wreckage was recovered.

Much effort is being devoted to the cost reduction program, with good results for the coming year. A review of the past year, discloses all projects planned and undertaken were completed, which speaks well for all departments at this station.

Although the customer has informed us there will be a 30% reduction, an increase in all departments for the month belies the fact. Planning personnel wise is very difficult under the circumstances.

TRAFFIC

	DEC	JAN
A/C arrivals	643	740
A/C departures	654	751
A/C Ron	354	358
Flt time Nha based AC	1182:42	1249:21
Block time "	1381:34	1484:26

CUSTOMER RELATIONS

Relations remain good.

OPERATIONS

This department has been routine for the month. One OM is on H/L and we are getting an assist from one OM from DaNang. Our new pilot lounge should be completed this coming month and hope fully we will be able to cut down congestion in operations.

SECURITY

Remains good, with very little activity in the area.
