TOPIC TAGS: unidentified flying object, astronomic observatory, air force organization, *military personnel*

ABSTRACT:

Last November [1967] the Soviet Union formed a committee for the investigation of unidentified flying objects (UFO's). This committee, a part of EOSAF, is under the command of Air Force Major General Porfir Stolyarov. General Stolyarov recommended that the photographic investigation method be used. The data obtained during this investigation will be correlated by the Pulkovo Astronomical Observator, and the Crimea Astronomical Observatory. The observations have been entrusted to a chain of astronomical observatories all over the USSR as well as to civil aviation. Orig. art. has: 1 figure. [ (b)(3) ]
